## GALLIPOLIS.

THURSDAY, - - - NOV. 7, 1850.  
U. S. Senator.

The question who shall the Whigs support for U. S. Senator the coming winter, causes considerable speculation among our contemporaries. The Cincinnati Gazette says Mr. Corwin is not a candidate for the seat; we have seen no such announcement in regard to Mr. Ewing; on the contrary we had supposed that his friends would support him, and that there would be but one opinion among the Whigs of the Legislature—that Mr. Ewing would be their first choice.

But should it be decided to elect a new man, we believe that from the long list of our able men, no gentleman can be found better qualified, or that would more ably represent the State of Ohio, in the Senate of the United States, than the Hon. S. F. Vinton. Ripe with the experience of a quarter of a century in the lower House, familiarly acquainted with the history of the government during that period; prompt in the discharge of every duty that meets him as a legislator; conservative in his views; a good Whig sans peur et sans reproche, he is peculiarly well fitted for the post. This section of the State heretofore has been but seldom consulted by the Legislature in their selection of candidates to fill offices within its gift. The Miami Valley and the Reserve have successfully urged their claims. Of this we do not complain; neither would we urge any such claim in favor of Mr. Vinton; it is enough that the river counties have been as uniform in their support of Whig men and Whig measures as any other portion of the State, and if any new man is to be selected to be supported for the U. S. Senate by the Whigs of the next Legislature, Hon. SAMUEL FINLEY VINTON is the first choice of those counties.

**BOLTING.**—A portion of the Hamilton county Locofocos refused to support the regular ticket, and the Locos feared, and the Whigs hoped, the effects of the division would be to the advantage of the Whigs. The election told another story and showed old Hunkerism stronger than ever before in Hamilton. The bolting organ, the Dispatch, is dead, and we presume Dr. Duncan and his friends have found an inside berth much preferable to an outside.

Circus in town to-day, (Wednesday.)

Bishop Hamline, of the Methodist Church, is very low and not expected to recover.

The population of Columbus, Ohio, is 17,656. In 1840 it was a fraction over 6,000.

The Supreme Court held its annual session in this county on the 12th inst. The Judges, Avery and Spaulding, convened the court in the morning and adjourned in the afternoon and left for Burlington. There were but a few cases on the docket, one of which was taken to the Court in Bank: Cavilee et al, vs. Green, Griswold, & Co.

S. B. DROUILLARD and D. B. STRAIT, Esqrs., were admitted to practice law in the courts of this State.

All persons having articles they wish to send to the World's Fair, should immediately send word to the State committee, who will cheerfully furnish the necessary certificates and any information desired. Address, (post-paid,) Jos. SELLIVANT, Columbus.

All works intended for the exhibition, will, in the first instance, be admitted into England without payment of duty; after the exhibition, if not re-exported, the payment of duty will be required.

By reference to our telegraphic column it will be seen that the Hungarian exiles were to be permitted to leave the Turkish dominion and intend locating in the United States.

The steamer Zachary Taylor made her first trip to this place as a regular packet last Saturday night. She is a very neat boat and would do credit to any trade, besides being offered by gentlemen who, for skill and experience, cannot be surpassed on the river. We understand that the owners intend giving this trade a fair trial, and if a disposition is manifested by the citizens of Gallipolis to patronize this packet, that they will continue, otherwise they will be compelled to fall back on their old trade. She will make weekly trips, leaving this place for Cincinnati every Monday morning and returning every Saturday evening.

**LATER FROM CALIFORNIA.**—The steamer Alabama arrived at New Orleans on the 1st inst., from Chagres, bringing two days later news from California. Another very destructive fire had occurred at San Francisco, reducing one hundred houses to ashes. This is the only news of importance by this arrival. She brings 180 passengers.

At Louisville on the 2d the river had risen 14 inches at the wharf, in the last 24 hours, and 3 feet below the Falls. There is now five feet five inches water in the canal.

**NEW HAMPSHIRE.**—Long Jim Wilson, the only Whig in Congress from this State, having resigned his seat, a new election took place the other day to supply his place. Morrison, Loco, beats the Whig 63 votes. The Loco Legislature last winter added to the district Loco territory for the purpose of producing this result. New Hampshire and Ohio Locofocoism is true blue.

**MODESTY.**—Our neighbor around the corner is a modest man—so was the man who lectured on phrenology and referred to the three perfect heads: Webster's, Clay's, and modesty forbidding the mention of the third, with his hand on his cranium.

Gen. HOUSE, at our request, has furnished us for publication a short account of his trip to the Louisiana Railroad meeting. We doubt not our citizens would be glad of an opportunity to hear from the General more at length, and we would suggest the propriety of calling a meeting.

Mr. GEO. BARTY will accept of our thanks for a file of late Pittsburgh papers.

We are indebted to Judge MATHEWS, JAS. COUSING and JAMES SUMMERS for late Louisville and Cincinnati papers.

The accommodating gentlemen of the Wharf-Boat, Messrs. DONNALLY & MYERS, will accept of our thanks for late favors.

**STEAMBOAT RACE.**—The steamers Autocrat, Natchez No. 2 and Emperor left New Orleans for St. Louis together on a race. For 100 miles the contest was well maintained. The Autocrat made the run in 20 hours, 30 minutes, beating the Natchez 18 minutes, and the Emperor 1 hour and 45 minutes. It is said to have been the most exciting steamboat race ever run. No boilers "busted."

**LADIES' FAIR.**—The ladies connected with the Episcopal Society in this place, it appears from a notice inserted in another place, will hold a Fair in Maxon's new Hall, on Thursday, December 5th.

Townsend and Cottrell were tried at the last term of the Court of Common Pleas, in Washington, for burning the Marietta Bucket Factory, and found guilty. They were sentenced to twenty years imprisonment in the Penitentiary.

The officers of the fine steamers Cincinnati and Zachary Taylor have placed us under obligations for late Cincinnati papers.

Indian summer is upon us. The weather for several days past has been delightful.

Daguerreotypes taken at the Franklin House. See advertisement.

The store of Mr. A. McIntyre was burglariously entered Tuesday night, and fifteen dollars in money taken.

**CAMPAIGN BRIDGE.**—We are informed that the bridge across the mouth of Campaign Creek will be ready for the passage of carriages next week. This is certainly good news.

We are advised by Telegraph that the vote on the Boundary question gives a heavy majority in favor of accepting the proposition made by Congress in the Bill of the last session.

Mr. HARMANSON, a Member of Congress from Texas, died at New Orleans on the 25th of Oct.

The Rolling mill in this place, belonging to T. G. Gaylord & Co, was sold a day or two since, to Mr. Daniel Messmore, of Cincinnati, for \$67,900.—*Forti. Des.*

## To the Editor of the Journal:

Sir: At a meeting held Oct. 9th, 1850, I was appointed a delegate to attend a Railroad Meeting, to be held at Louisa C. H., Va., on the 17th of the same month. On the 10th I proceeded on the route, via Kanawha Salines, and arrived at the place appointed in time for said meeting. I found there the Directors of the Central Railroad Company, and a large number of stockholders in said Company. Also, the State's proxy, and a number of delegates from several of the western counties of Virginia. After the meeting had attended to what immediately concerned the Company, they took up the subject of continuing the said road from Staunton towards Covington. They resolved to put about 20 miles of the same under contract so soon as it can be prepared. The same railroad is in use from Richmond to Charlottesville, a distance of about ninety miles, and from Charlottesville to Staunton, a distance of about forty miles is under contract by the Company, except the Blue Ridge Tunnel and about 7 miles east of the Ridge. The Tunnel is the work of the State, and is now being constructed under the Board of Public Works. They have entered the mountain on the west side something like eighty feet, and are progressing apparently very well; on the east side they have made all of the open cutting and are ready to commence the Tunnel from that side. The distance through the mountain, as I was informed, is four thousand seven hundred feet, of very hard rock. It will be a great work when done.

The officers, stockholders and delegates at the meeting, expressed themselves thoroughly in favor of, and a determination to make every exertion in their power to have this railroad continued to the Ohio river, to such a point as would best meet the road by Chillicothe, Cincinnati, and through Indiana and Illinois, to St. Louis, Mo. Whether it shall be the mouth of the great Kanawha, Guyandotte, or Big Sandy rivers, they have not that personal knowledge to enable them at present to decide. They, like all others, are desirous of having the nearest and best route. When that shall be decided upon, there will be no further contest as to the route. There will be an effort made at the next meeting of the Virginia Legislature, for a charter to extend from Covington to the Ohio river. When that is done it will be time for all that feel an interest in the road to do all in their power to forward its construction in as short a time as possible. If the mouth of the Great Kanawha shall be settled on as the Virginia terminus, (of which I have no doubt,) then we have our work before us, to make the road through to Chillicothe, and that just as soon as possible.

Very respectfully, yours, &c.,  
GEO. HOUSE.

**THE MASONIC MONUMENT SHIPPED.**—Mr. D. Bolles, Fourth street, shipped the monument block of marble ordered by the Masonic Grand Lodge of Ohio, yesterday. It is a beautiful specimen of workmanship, and a diploma has been awarded Mr. Bolles for the same by the Ohio State Fair. The block was sent on the "Cincinnati," Capt. John Birmingham. The block is said to be the best piece of sculpture that has yet been forwarded.—*Cin. Com.*

**BISHOP PURCELL.**—The last number of the Catholic Telegraph contains the letter of Cardinal Franzoni to Bishop Purcell, creating him Archbishop of the new Archdiocese of Cincinnati. The Bishops of Louisville, Vincennes, St. Louis, Detroit and Cleveland are Suffragans of this See. Bishop Purcell is an able and popular representative of the Catholic Clergy, and must, we presume, be very acceptable in his new capacity, to the people and Dioceses over whom he will preside.—*Cin. Gaz.*

**MAYSVILLE AND LEXINGTON RAILROAD.**—The citizens of Maysville, and all along the line of the proposed Railroad, are exhibiting the right spirit, and working with hearty good will, to effect the commencement and accomplishment of this important work.

The Maysville Eagle notices sundry meeting of the people, and the one at Maysville was characterized by actions as well as words.

The following resolution was adopted: Resolved, That the citizens of Maysville, now assembled in public meeting, pledge themselves to procure to be taken by private subscription within the city—stock to the amount of Fifty Thousand Dollars, in the Maysville and Lexington Railroad Company.

The Eagle says, that a subscription of stock, by persons then in the Court House, was made of \$27,000. The city have authorized a corporation subscription of \$150,000, and "it is taken for granted, that the road will be made, and that speedily."

**MAYOR OF NEW YORK.**—The Whig Convention have nominated Mr. A. C. Kingland as their candidate for Mayor. The contest, therefore, is between him and Fernando Wood.

**IMPORTANT ARREST.—COUNTERFEITERS TAKEN, THEIR PRESS, &c.**—On the 18th inst., three counterfeiters were captured in St. Louis. They gave their names as Daniel McAfee, W. J. Bowers and James Loevoey. In their possession was a press, a copper-plate of a ten dollar bill on the State Bank of Missouri, and all the apparatus for executing finished work.

In McAfee's possession were found \$2,790 in blanks from the above plate, and a well executed \$10 bill on the State Bank of Ohio. Bowers and Loevoey had \$5,510 of the blank notes, and when arrested were striking off the bills.

McAfee keeps a grocery in St. Louis—has considerable means and was the writing member of the firm, it is supposed. Of Bowers, nothing definite is known, but Loevoey is an engraver by trade, young in years, and had been suspected by the police for some time. He is said, by the St. Louis Union, to be under indictment in Cincinnati for the same offence.

**JOHN McDONOUGH.**—The National Intelligencer of this morning, says that it learns through a telegraphic communication to the Rev. Wm. McLain, Secretary of the American Colonization Society, that Mr. John McDONOUGH, of New Orleans, has bequeathed to the Colonization Society "one eighth of the net revenues of his estate during forty years, but not to exceed twenty-five thousand dollars a year." It is added that "the will is complicated, and its validity doubtful."

The Intelligencer has the following notice of the deceased, who was a native of this city, where members of his family still live.—*Balt. Pat.*

Mr. McDONOUGH was a merchant and planter, and settled in New Orleans while Louisiana was a colony of Spain. During some forty years of successful business he amassed an immense fortune, estimated at several millions of dollars. Like all men who have become rich by industry from small beginnings, he was frugal, exact, and what the world called parsimonious; but with these qualities he blended the apparently contradictory one of liberality; for he subscribed munificently to the benevolent institutions of the country. He employed a clergyman for regular religious services for his numerous slaves, to all of whom he gave some education, and at one time liberated and sent to Liberia eighty-five of them, making ample provision for their transportation and settlement. Yet this man was announced in the telegraphic note we published yesterday as "a miser."

**THE EPISCOPAL CONVENTION.**—The House of Bishops have refused to restore Bishop Onderdonk, and have rejected the petition of the Diocese of New York, both by a majority of about 2 to 1. A canon has been passed by the House of Clerical and Lay Deputies, providing for the election of an Assistant Bishop where the Bishop of a diocese has been suspended. The Convention have adopted a resolution providing for a triennial meeting of the Trustees of the Theological Seminary at the same time with the convention.

**WHERE IS THE WILDERNESS.**—At the beginning of this century it was in Ohio and Indiana. Twenty-five years afterwards it was in Michigan, Wisconsin and so forth. Last year it was in Minnesota territory. Next year we shall have to seek it in Nebraska and around the Lake of the Wood.

Where the steamboat goes, there the wilderness disappears. And the steamboat is soon to startle the Indian and wake the echoes of the forest above the falls of St. Anthony; for a boat is now building there which is rapidly progressing. The time for launching her has even been fixed—"as soon as the river is clear of ice." The builder hails from Bangor, Maine, the opposite extremity due East, and is said to be "a highly skillful workman." The dimensions of the craft are 103 feet keel, 120 feet deck, 18 feet beam, and will draw twelve inches light. The machinery is in course of construction at Bangor, and will be at the falls by the opening of navigation. "Steam navigation river trade" above the Falls of St. Anthony. Poetry may as well gather up its garments and emigrate from this land, unless it can be content to find its themes in the workshop and crowded street.

*Cin. Gaz.*

**FUGITIVE SLAVES IN CANADA.**—It is estimated, that about 2,000 fugitive slaves are gathered in the villages of Malden, Sandwich and Windsor. The commanders of the British garrison at Sandwich and Malden, have given up the barracks to lodge them in. It is said the barns and vacant houses, up and down the Detroit river are full. The lower ports on Lake Ontario are also reported full of them, that the back settlements in Canada have more arrivals than they can feed, and that the cars and steamers every arrival bring more.

## ARRIVAL OF THE CANADA.

The Canada arrived at Boston on Monday night. The mail of this morning brought the papers and letters received by her. There is nothing important in the general news in addition to what we have had by telegraph.

The London Morning Chronicle says in relation to the affairs of Austria, Prussia, and Hesse Cassel:

How a collision is to be avoided under these circumstances it is difficult to understand. Each government may be said to have its finger on the hair-trigger of a mighty fulminating needle gun, the first flash of which will ignite the vast magazines of combustible matter collected on all sides, and if the explosion takes place, there is no man that can predict the lamentable results. All Germany will be converted into a Schleswig-Holstein—more need not be said; nor a greater misfortune befall it.

The Porte has just published a decree, permitting all foreigners in their service to resign, no matter what their creed. This measure offers facilities to a number of refugees who had adopted the Musselman faith, to return to christianity; Gen. Bem is mentioned foremost in the list.

It is stated that about £70,000 was paid by the government of Spain for the steamships Hibernia and Calcedonia.

Letters from Athens of Sept. 30th, state that some English vessels had taken in their cargoes, without performing the legal formalities. In consequence, the authorities were unwilling to allow them to sail, and for this delay England has demanded reparation.

The first contribution from the continent to the Great Exhibition of 1851 has arrived in England. It consists of a consignment of 89 packages by the steamer Neptune from St. Petersburg.

From Frankfort we learn, of the 14th inst., that the rumors of the Elector's abdication were unfounded, and at all events premature. It is now stated that Count Thun, the Austrian agent, has prevailed upon the Elector for a time to put off his intended abdication.

Advices from Rendsburg and Hamburg of the 11th and 12th inst. state that the Danes were employed in fortifying their position in the north and west of Frederickstadt, and in the vicinity of Schleswig. Tonnage, too, was surrounded with entrenchments, being attacked by Holstein horse artillery and their fire.

The Calcutta Railway is commenced. Sir Charles Napier was at Simla on the 5th of September, and the Governor General will arrive there at the end of September; and then visit the Punjab. It was reported that Sir H. Lawrence had fallen in to the hands of one of the tribes in Casimere, and was detained a prisoner. A mutiny had broken out among the Nizam's troops. The cholera still prevails in Scinde. Sir James Brooke sailed from Siam on the 3d of August.

At a fancy ball in Louisville, Mr. T. J. Casey of New Orleans, appeared in the character of a census taker. He had his schedule with him, and caused much amusement in his questions as to the age, wealth, &c., of all the pretty ladies. We heard him question one fair dame who said she was just seventeen, born in California, and worth sixty-two millions. The census taker looked somewhat astonished, and as for ourselves we commenced pouring forth all our eloquence in praising the inimitable charms of the lady. We noticed that our census man was, after that disclosure, found in happy converse with the huge fortune so unexpectedly discovered.—*N. Y. paper.*

M. de Lamartine was lately in Paris, and has frequently been present at the meetings in the palace of the Assembly. His friends find it difficult to recognize him, for he rather affects just now to dress in the rustic style. His voyage to the East does not appear to have improved his health much; on the contrary, the excessive heat of the East seems to have a very debilitating effect upon him; he has never appeared more unwell and suffering than at present. He was to go to London to make some arrangements touching his colony in Turkey.

**Singular Offer if True.**—A lawyer in extensive practice in Boston, has been offered \$12,000 per year for two years, the payment guaranteed by security on real estate in New York, to go to California and exercise his talent in defending an association of burglars and thieves. The condition of the offer was that any money received by him for defending others, or for services rendered to others than members of the gang, should be credited to them as part payment of the salary. He peremptorily declined the offer.

*Norwich Courier.*

**THE TOBACCO BUSINESS.**—There are in operation at the present time in Richmond, forty three Tobacco Factories, in which are employed over 2,300 hands, and which produce in manufactured tobacco fourteen millions five hundred thousand pounds annually.

The President of the State Board of Agriculture of Ohio, addressed a circular letter to the undersigned, with a view of obtaining the agricultural statistics of Gallia county for the year 1850. As it cannot be done without the aid of agriculturists and others, I have herewith published the questions, as propounded to me, requesting the farmers to give me all the information wanted on the various topics appended. It is desirable that the old farmers and the young Buckies should try their hands. The various reports must be made within the next two weeks, and forwarded to me immediately, so that I can make the report at an early day. I regularly receive the Annual Report of the State Board of Agriculture, and those who do not receive them, can see mine, at any time.

## LEWIS NEWSOM.

1. What are the principal crops and agricultural products of your county—stated in the order of their comparative amount or value?

2. **Wheat.**—What is the usual average product of wheat per acre, in your county, and the average the past season? To what kind of disease or injury is the crop most liable with you, and what means are found most effectual in preventing such disease or injury? State, if you can, the probable aggregate amount produced in the county, the present year. If any improvements in kinds of wheat or modes of culture have been introduced, please name them.

3. **Corn.** What is the usual average yield per acre, and what the character of this year's crop? How is this crop mostly used or disposed of in your county; and what is the common price per bushel in the nearest market?

4. **Oats.**—What is the usual average yield—and that of the past season? What kind of injuries is the crop most liable to, and how are those best prevented?

5. **Rye and Barley.**—What is the usual product per acre—and the supposed amount grown in your county? What is the usual price of each in the nearest market?

6. **Grass and Hay.**—What is the usual average yield, and that of the present season? Was the crop much shortened by drouth, and on what soils, or with what management was the best yield obtained? What is the usual and present price of hay in your county?

7. **Root Crops.**—What is the usual average yield of potatoes, and the character of this year's crop? What varieties are most approved, and the comparative merits of each, as to yield, quality for table, or for stock, liability to disease, &c.? What mode of culture, kind of manure, &c., is found best adapted for this crop, and what means, if any, are used to prevent disease? If any other root crops, as turnips, carrots, field beets, &c., are grown, as food for stock, &c., mention the same, and to what extent.

8. **Fruit.**—What is the character of the fruit in your county; and are any efforts being made for its improvement? Is it an article of export, in green or dry state, and to what extent?

9. **Seeds.**—What amount of clover, timothy, and flax seeds, is grown in, or exported from your county per year? What is the usual average yield of each per acre, the yield of the present year, and the value in market?

10. **Other Crops.**—Is any hemp or flax grown from the fibre—any broom corn, tobacco, field beans, castor beans, hops, mustard seed, madder, mint oil, &c., if so, state the aggregate amount or value of each, yield per acre, mode of culture, &c.

11. **Dairy Products.**—What is the probable amount of butter and cheese manufactured for export, in your county, and the value of each? Has there been any marked increase of this business of late, or improvement in the quality or process of manufacturing butter or cheese? If so, describe it. What breed of cows, if known, are preferred for dairies, and what is the average product, per cow, of butter and cheese per year.

12. **Sheep and Wool.**—What is the supposed aggregate amount of wool produced in the county, and what is its general quality? Is there any great increase in the number of sheep, and improvement in the character of flocks? What variety, or breeds of sheep are preferred, and the reason for such preference?

13. **Pork.**—What is the supposed aggregate of Pork in the county, and its value. Is it mostly slaughtered in your county, or where? Has the quality of the hog stock been improved?

14. **Beef.**—What number of beef cattle are annually raised in the county, and exported or slaughtered; and the aggregate value of each, say at 4 years old. Has there been any improvement, of late in the breed of cattle, by importation from abroad, or otherwise; if so, what breeds are preferred, and why?

15. **Horses and Mules.**—What number of horses are supposed to be annually produced in, or exported

from your county? Has any marked improvement been made of late in horses, what class is preferred, and why? What is their average value, say at 4 years old? What number of mules are raised, if any, and their value?

16. **Implement.**—Have any new and improved agricultural implements—such as wheat drills, sub-soil plows, rollers, harvesting and threshing machines, &c., been introduced of late, and with what supposed advantage?

17. **Other Improvements.**—Have any experiments been made in the renovation or enrichment of soils, or in draining wet lands? If so, state their character, cost and results.—If there is an Agricultural Society in your county, see that the proper officers send a report to the Board, and if there are any other evidences of improvement in the agriculture of your county, please name them; also, add any suggestion that you may deem of importance on this subject.

18. **Minerals.**—What is the annual product of coal, iron, salt, or other minerals, in your county, and the value of each? Is there any marked increase in these departments?

19. **Mills, &c.**—Is there any considerable increase in the number of mills and manufactories—including iron furnaces, salt, wells, potteries, &c.?

20. Please inquire of your county Auditor, whether the law relating to public shows has been enforced, and what amount has been collected for the State "Agricultural Fund" the present year; and add the same to your report, also, should there be any "escheated lands" in your county, please mention the same.

It is rumored that Miss Catherine Lawrence, second daughter of Abbot Lawrence, American Minister at the court at St. James, is about to be married to the Marquis of Grafton, the eldest son of the Duke of Rutland.—*N. Y. Express.*

The Steubenville (Ohio) Herald says there had been no death there from cholera for the twenty-four hours ending on Thursday at 5 o'clock P. M.—that the cholera symptoms are becoming less prevalent, and the excitement was passing off.

**MARRIED.**—On the 23d ult., by the Rev. J. H. Hopkins, LEMUEL GREEN to MISS SARAH DONNALLY.

On the 27th ult., by the same, Rev. JESSE INGLES to MARY ANN, daughter of Rev. Wm. Waddell.

Also, on the 31st ult., by the same, JOHN W. JAMES to ISABELLA MONMOM, all of Gallia county, Ohio.

**DIED.**—On the 18th inst., at his residence near Burlington, Ohio, of pulmonary consumption, WYATT C. WHEELER, late editor and publisher of the "Lawrence County Gazette."—*Ironton Register.* The deceased was very well known to many of our citizens, having been born and partly bred here. He, in company with Mr. Drouillard, established the Portsmouth Clipper, in 1845, and in the fall of the same year he issued the first number of the "Lawrence County Gazette," the publication of which he was obliged to suspend on account of ill health.—*Porti. Inquirer.*

On the 25th inst., at his residence at Pine Grove Furnace, JOHN F. STEELE, of the firm of R. Hamilton & Co., aged 28 years.—*Ironton Register.*

**ROBERTS' COMPOUND SYRUP OF LIVERWORT AND TAR.**—Among all the medicines extant, there is probably no one so justly deserving the confidence of the public as this, as a safe and certain cure for consumption of the lungs, spitting of blood, coughs, colds, asthma, pain in the side, bronchitis, whooping cough, and all pulmonary affections. Numerous certificates are in the hands of the agents, showing in the most satisfactory manner the surprising effects of this Syrup where it has been used. It is for sale in nearly every township in this county. See advertisement in another column. Oct 24

**Dr. Guyott's Yellow Dock and Sarsaparilla.** For the cure of diseases, or as a spring purifier of the blood and as a general tonic for the system, is unrivalled.

The curative powers of this extract are truly wonderful, and all invalids should make immediate trial of the "Yellow Dock and Sarsaparilla." It cannot injure the most delicate patient.

**SCROFULA.**—It has been remarked by eminent men, that in the varied catalogue of diseases to which man is liable, there is scarcely one of such importance, and of such interest as scrofula, whether we look to the obscurity of its origin, its insidious progress, the number and variety of organs that it attacks, or its remarkable incurability and extensive fatality. Scrofula has baffled the skill of the most eminent Physicians in this country and in Europe. But there is an antidote for this disease in "Dr. Guyott's Extract of Yellow Dock and Sarsaparilla," which is proving itself a perfect Specific in the most severe cases of Scrofula. See Advertisement. Oct 17

## LADIES' FAIR.

The ladies of the EPISCOPAL CHURCH purpose holding a FAIR in the room adjoining the Sons' Hall, Star building, Gallipolis, on Thursday, the 5th of December, commencing at half past 10 A. M. As the object of this Fair is to aid in benevolent church purposes the public are respectfully invited to attend and patronize it; and the members of sister churches are particularly requested to attend. Refreshments of various kinds will be prepared and kept open during the day for the accommodation of persons coming in from the country, and in the evening the room will be brilliantly illuminated, and in addition to the sale of "FANCY ARTICLES," refreshments of every kind will be in readiness for visitors. Admission 10 cents; Tickets at the door. Give us a call. Nov. 7, '50.
